

# Unlocking Team Potential

## Immersive Journey to Breakthrough Performance

Is your agile team eager to overcome obstacles and reach new heights, but unsure of what's holding them back? Or are you struggling to come together as a team? Our transformative 3-day engagement is designed to empower your team and their Scrum Master/Agile Coach with fresh insights and unleash their collective potential.

### What you get

- **An evaluation** of your current team behaviors
- **A day of intense collaboration** where team members get a deeper understanding of how their behavior affects them as a team
- **Collective coaching** on how to improve collaboration within the team
- **Guidance for Scrum Master/ Agile Coach** on what to be aware of within the team, and which experiments to run.

### What we do

- **Alignment and Observation (1 Day)**  
We start by aligning expectations and gather an initial understanding of your team dynamics and the different people in your team. Understanding your unique challenges lays the foundation for the day of impactful Mob Programming.
- **Mob Programming and Coaching (1 Day)**  
Immerse your team in the power of Mob Programming - a dynamic collaboration approach. Witness how team members interact, collaborate, and produce results together. Throughout the day, our expert coach provides brief hourly coaching sessions, guiding your team towards seamless collaboration and improved outcomes.
- **Debriefing and Mentoring (1 Day)**  
On this critical day, we facilitate a comprehensive debriefing session, reflecting on the experience and lessons learned. We then use our observations during both the Mob Programming session and debrief to coach and mentor the Scrum Master on how to move forward. The goal of this session is to equip your Scrum Master with the insights to drive continuous improvement and unlock the team's full potential.

Embrace this immersive journey to uncover hidden barriers, foster collaboration, and elevate your team's performance.
